

# AMBULATORY SURGERY CENTER SOFTWARE

THE COMPLETE SOLUTION

**Top Performing Ambulatory  
Surgery Center Solution 2018**

# What makes us different?

## Years of experience delivering a proven solution

HSTpathways is a comprehensive ASC Surgery Software System. The company is located in the technology corridor of Silicon Valley and has been serving customers nationwide since 2005. The HSTpathways solution suite incorporates all of the features and functionality needed to efficiently operate an outpatient surgery center.

The cloud-based application spans freestanding ambulatory surgery centers, multi-facility corporate enterprises, and joint ventures with hospitals.

The solution encompasses:

- Surgical scheduling
- Inventory management and case costing
- EHR clinical workflow
- Billing and collections
- Comprehensive Reporting

## Architecture for speed, reliability, and scalability

Whether your facility is an independent ASC with limited IT resources or a management company seeking the most technologically advanced enterprise ASC software solution, HSTpathways is capable of exceeding your technology needs. HSTpathways was built utilizing a scalable architecture to create a secure environment that is unparalleled in delivering data integrity, stability and performance. HSTpathways' hosted cloud environment is backed by nationally recognized security certifications required by publically traded companies and a well-established track record of 99.999% uptime dating back to 2008. The solution includes a proactive monitoring interface engine giving you the flexibility to connect with other ASC vendors and local hospitals via HL7 standards and protocols. HSTpathways is the solution to lower your ASC's cost of ownership while maintaining the highest level of performance in the ASC industry.

## Value that extends the complete patient care continuum

Operating ASCs efficiently and cost effectively is essential in today's healthcare environment. With the HSTpathways surgery center information system, you have all the tools necessary to maximize revenue and optimize both the business and clinical processes in the center. Maximize and analyze your block schedule utilization with the included scheduling module. Utilize the full HSTpathways and HSTeChart solutions to have true case costing and inventory tracking. This allows a center to capture every dollar spent while evaluating areas for savings and automating the purchase order process. With the Patient Responsibility Estimator and Real-time Insurance Verification, you can be sure to increase your collections at the point of service and reduce claim rejections for invalid demographics. Post electronic remittance advices (ERAs) with just a few clicks. ERA posting is quick, accurate, and allows for a more comprehensive denials tracking process. When you do have claim denials, HSTpathways includes a Workflow Manager to help you establish work queues for your staff with efficient ways to follow up on outstanding accounts receivables and aging balances.

## Successful implementations and quality support is a company-wide commitment

HSTpathways Professional Services team leads the ASC industry in providing superior training, implementation and support. The team has extensive industry knowledge and strives to provide an optimum customer service experience by delivering prompt responses. Customers have a voice in directing product development and providing input on best practice workflows. HSTpathways encourages "user to user" interaction and proactively engages customers on the HST User Community Portal. The users can post questions to other users on the forum, watch product training videos, and participate in ongoing workflow and training webinars hosted by one of the HSTpathways Professional Services team experts.

Effective and successful training is the single most important factor to a customer's satisfaction with an information system. HSTpathways presents experienced training professionals who understand the ASC industry. Our training professionals will assist you in merging your current processes with the software application features and functions. We will tailor a combination of web-based and on-site training sessions to meet your current and future requests.

# Software solutions for Ambulatory Surgery Centers

HSTpathways ASC Surgery Software system encompasses all of the features and functionality needed to efficiently operate an outpatient surgery center. The application includes surgical scheduling, supply chain management, insurance and patient billing, accounts receivable collections, and state reporting.

HSTeChart is a new way to chart. This ASC charting solution offers real-time data sharing, flexible configuration, true concurrent charting, chart completion status, consistent navigation, and optimized clinical practice. Collaboration, speed, and flexibility are the pillars of HSTeChart designed entirely for the Ambulatory Surgery Center setting.

HSTanesthesia practice management software is specifically designed for practice revenue cycle management. HSTanesthesia can accommodate all of the billing, collections, and quality reporting requirements and seamlessly works in concert with HST pathways ASC software to maximize data sharing and rapid anesthesia billing.

## About HST

HST was founded by Tom Hui in 2005 to address the information system needs of the ASC industry. Tom was founder and President of SIS (later known as SurgiSource) from 1989 to 2001. When HST was established, Mr. Hui assembled an experienced team of engineers and surgery center professionals to develop HSTpathways. The team's commitment is to restore integrity, confidence, reliability, and competition in ASC Information Systems. That commitment is still the foundation of the company today.

We value our customers as true partners; your success is our success. Your software solution should be your greatest asset in trying to achieve your performance goals at the lowest total cost of ownership. Many surgery centers already enjoy the benefits brought by HSTpathways. Find out why so many surgery centers have already selected HSTpathways and hear about their positive experiences!
