Automated data sharing from the ASC to the Anesthesia Practice Software

HSTanesthesia was developed to address the unique billing needs of an anesthesia practice. Whether a surgical case has one provider or multiple providers, HSTanesthesia has you covered from billing through provider reporting. Also, the practice or provider may be dedicated to one service location or many locations in need of anesthesia services. HSTanesthesia empowers the anesthesia practice to service as many locations as desired by the organization, while still having maximum control over segmenting and reporting the receivables by service location and provider.

HSTanesthesia was developed to work seamlessly with surgery centers that use HSTpathways ASC software. The patient demographics, insurance, and available case data will transfer over from HSTpathways to HSTanesthesia. The data transfer virtually eliminates duplicate data entry and billing delays. To optimize the value of servicing many service locations, data transfers can originate from multiple HSTpathways ASC facilities. That means that an Anesthesia practice can service 1 or 100 HSTpathways ASCs and enjoy the same automated data transfer with minimal human intervention, faster claim submission, and quicker reimbursement.

Tracking quality measures is easy with HSTanesthesia. With the integration across the full suite of HST’s products, anesthesia providers can capture the anesthesia quality measures in HSTeChart that flow to HSTanesthesia. The data can be exported for internal and external quality monitoring.

Anesthesia Billing is just a few clicks away

HSTanesthesia is a comprehensive anesthesia software solution that encompasses all the features and functionality needed to efficiently manage anesthesia billing for all service location settings.

Anesthesia Revenue Cycle Management
- Comprehensive Revenue Cycle Management for Registration, Billing, Collection, and Reporting
- Data transfer from HSTpathways eliminating duplicate data entry and billing delays
- Transfer data from one or multiple HST facilities

Provider Credentialing
- Hold claims pending insurance/provider contracting
- Easily release claims during next claim generation once a provider is credentialed.

Anesthesia Reporting
- Quality measure data capture incorporated into the workflow
- Provider concurrency tracking and reporting
- Industry best practices reports with flexible user-defined selection and sorting

What makes us different?
- Easy training and adoption between HSTpathways and HSTanesthesia.
- Data transfer of patient demographic, visit, provider, and procedure information seamlessly from HSTpathways to HSTanesthesia.
- Rapid and Repeatable Implementations including on-site and virtual training for customers to produce the best implementation results.
- Scalable IT Platform for Anesthesia Practices including Enterprise design which spans large national enterprises and extends into independent practices and facilitates consolidated reports and dashboards.
- Single Sign-On support for Active Directory to simplify user logons, access rights, privileges, and control and compliance measures.
- Reliable Support from a strong team with in-depth industry knowledge and appropriately staffed help desk to respond to and resolve your questions promptly.
- True Cloud Infrastructure in a hosted data center designed with Raid Level 10 SAN.

About HST Pathways

HST Pathways provides scalable and reliable software that enables our customers to continuously improve processes, profitability, and quality outcomes. HST Pathways is more than just a software vendor, it’s a company-wide commitment to partner with our customers and other vendor-to-vendor technology leaders to deliver high quality software, exceptional services, and innovative solutions that proactively comply with the changing regulatory requirements.

We value our customers as true partners; your success is our success. Your software solution should be your greatest asset in trying to achieve your performance goals at the lowest total cost of ownership. Many surgery centers already enjoy the benefits brought by HST Pathways. Find out why so many surgery centers have already selected HST Pathways and hear about their positive experiences!

HST Pathways ASC Surgery Software system encompasses all of the features and functionality needed to efficiently operate an outpatient surgery center. The application includes surgical scheduling, supply chain management, insurance and patient billing, accounts receivable collections, and state reporting.

HSTeChart is a new way to chart. This ASC charting solution offers real-time data sharing, flexible configuration, true concurrent charting, chart completion status, consistent navigation, and optimized clinical practice. Collaboration, speed, and flexibility are the pillars of HSTeChart designed entirely for the Ambulatory Surgery Center setting.

HSTanesthesia billing software specifically designed for practice revenue cycle management. HSTanesthesia can accommodate all of the billing, collections, and quality reporting requirements and seamlessly works in concert with HSTpathways ASC software to maximize data sharing and rapid anesthesia billing.
