HST *pathways*

ASC software to streamline your business management

HSTpathways is a comprehensive ASC Surgery Software System that encompasses all of the features and functionality needed to efficiently operate an outpatient surgery center. Your software solution should be your greatest asset in trying to achieve performance goals at the lowest total cost of ownership.

Timely and accurate billing and collections can have a dramatic impact on the overall success of the surgery center. Clean claims and timely collections are critical to the cash flow and reducing days outstanding in accounts receivables. HSTpathways optimizes billing to maximize contractual reimbursement, and runs basic pre-billing claim checks to increase claims paid upon the first submission. Insurance claim denials, however, are a way of life. Having the tools to automate the task management workflow by routing tasks to the most proficient members of the staff can rapidly decrease the amount of time it takes to resolve outstanding balances. HSTpathways also provides the facility with the tools to do patient cost estimations leveraging the center's actual payer contracts and the patient's benefit information.

HST invested in designing a technology platform that is reliable, stable, and proactive. HSTpathways ASC Software uses a powerful relational database and security driven system architecture to allow for easy end user access to valuable surgery center information while providing "One Click" IT security management and maintenance. Whether you are an independent ASC with limited IT resources or a management company seeking a state of the art enterprise ASC software solution, HSTpathways is scalable and able to meet your technology needs.

Training is the single most important factor to a customer's satisfaction with their use of an information system. HST presents training professionals who have years of experience in ASC business processes to make each implementation of HSTpathways a success. Because each customer's needs have slight differences, HST's training professionals will assist you in merging your policies and procedures with the software application features and functions. A combination of Web-based and on-site training sessions will be tailored to meet your current and future needs

HSTpathways Components

Surgical Scheduling
- O.R. Scheduling - full support for maintaining Physician and Physician Group Block Times and Resource Conflict Notification
- Patient Registration - Employment, Real-time Insurance Verification, Pre-Op Checklist, Medical Chart Forms and Labels

Billing and Coding
- Visual Indicators for missing or incomplete claim data
- Access to all areas of the patient account for easy coding and data entry
- Intuitive patient statement generation with the ability to define parameters

Supply Chain Management
- Item master supports par levels, multi-vendor and multi-pricing, multi-dosage items, equipment, and consignment
- Electronic PO (EPO) interface with McKesson with "real time" acknowledgement

Collections and Workflow
- Management reporting
- Capabilities to monitor work volume and metrics to continually improve performance
- Create and post electronic remittance advice (ERA) transactions to patient accounts in only a few clicks

What makes us different?

- Positive Return on Investment for your ASC Software System, reduced AR days with faster claim to payment turnaround time and robust inventory management.

- Scalable IT Platform for Surgery Centers including Enterprise design which spans large national enterprises and extends into independent surgery centers, and facilitates consolidated reports and dashboards

- Rapid and Repeatable Implementations including on-site and virtual training for customers to produce the best implementation results

- Single Sign-On support for Active Directory to simplify user logons, access rights, privileges, and control and compliance measures.

- Reliable Support from a strong team with in-depth ASC industry knowledge and properly staffed help desk to respond to and resolve your questions promptly

- True Cloud Infrastructure with 99.999% uptime in a hosted data center designed with Raid Level 10 SAN

Technical Specifications

Recommended Cloud (ASP) Model

Workstation Component

|	
Processor	1.6 GHz Intel Core i5
RAM	4 GB or more
Hard Drive	128 GB or more
Display	WXVGA (l,366 x 768) or Higher resolution video adapter and monitor **HST strongly recommends the use of 19 Inch Wide Screen Monitors or larger using a WXGA+ screen resolution of 1440 x 900.*
Operating System	Windows 7 Professional SPl (32-Bit or 64-Bit) or higher
Browser	Microsoft Internet Explorer 11 and Edge
Printing	Latest Version of Adobe Acrobat compatible reader software
Other Software	.net 4.52 or greater

Server requirements for alternative LAN model

Microsoft Windows Server	2012 standard addition or 2012 R2 (64-Bit) .Net Framework 4.52 or later Microsoft SQL Server: Microsoft SQL Server: 2014 (64-Bit) Standard or Enterprise editions
Web Server	Microsoft Internet Information Services (IIS) Version 8.x with 6.0 backwards compatibility and management components
Processor	2.2 GHz, Quad-Core or better, 64-Bit Windows Server, RAM: 16 GB or more
Hard Drive	500 GB or more, Raid-5 or better data protection scheme
Display	Super VGA(1,024x768)
Network	100 Mbps or faster

About HSTpathways

HSTpathways is more than just technology, it is a company-wide commitment to partner with our customers and other vendor-to-vendor technology leaders to deliver high quality software, exceptional services, and innovative solutions that proactively comply with the changing regulatory requirements. HSTpathways provides scalable and reliable software that enables our customers to continuously improve processes, profitability, and quality outcomes.

HST was founded by Tom Hui in 2005 to address the information system needs of the ASC industry. Tom was founder and President of SIS (later known as SurgiSource) from 1989 to 2001. HST assembled an experienced team of engineers and surgery center professionals to develop HSTpathways. Tom Hui's commitment is to restore integrity, confidence, reliability, and competition back into ASC Information Systems. Many surgery centers already enjoy the benefits brought by HSTpathways. It is not a question of "if" you will convert from your legacy system, but a question of "when". Find out why so many surgery centers have already selected HSTpathways and hear their positive experiences!

HST *pathways*

HSTpathways ASC Surgery Software system encompasses all of the features and functionality needed to efficiently operate an outpatient surgery center. The application includes surgical scheduling, supply chain management, insurance and patient billing, accounts receivable collections, and state reporting.

HST *eChart*

HSTeChart is a new way to chart. This ASC charting solution offers real-time data sharing, flexible configuration, true concurrent charting, chart completion status, consistent navigation, and optimized clinical practice. Collaboration, speed, and flexibility are the pillars of HSTeChart designed entirely for the Ambulatory Surgery Center setting.

HST *anesthesia*

HSTanesthesia billing software specifically designed for practice revenue cycle management. HST anesthesia can accommodate all of the billing, collections, and quality reporting requirements and seamlessly works in concert with HSTpathways ASC software to maximize data sharing and rapid anesthesia billing.
